Experience

Software Engineer — Freelance / Contract

2023 – Present

- Built and maintained web applications and APIs for small businesses and startups, including booking and reporting features for hospitality clients.
- Implemented RESTful endpoints with Node.js/NestJS and PostgreSQL; improved data access performance and reduced query latency by optimizing indexes and queries.
- Developed frontend interfaces using React/Next.js and Tailwind CSS with responsive, accessible components and client-side form validation.
- Integrated third-party services (email, analytics) and deployed apps using containerized workflows.

Projects

Streamline — Hotel Operations Platform

React · Node.js · MySQL

Lead developer (frontend + backend). Delivered booking management, staff scheduling, and reporting features; collaborated with stakeholders to reduce manual tasks.

Customer Satisfaction Monitoring System

React · Node.js · MongoDB

Backend & dashboard developer. Built data collection endpoints and a dashboard to visualize satisfaction metrics; enabled managers to act on feedback faster.

Technosophia IT Solutions Website

Next.js · Tailwind CSS

Responsive marketing site with accessibility fixes. Additional JS/Python projects:
github.com/HeniTech2

Certifications

Front-End Web Developer — Udacity
